Labour force participation rate -- ILO modeled estimates, July 2015

The labour force participation rate is the proportion of a country's working-age population that engages actively in the labour market, either by working or looking for work. This indicator is part of the ILO *Estimates and Projections series*, analysed in the ILO's *World Employment and Social Outlook reports*. For more information, refer to the indicator description and the labour force estimates and projections methodological paper.

Reference Area	Source	Age	Time	Labour force participation rate -- ILO estimates and projections (%)			Labour force -- ILO estimates and projections (thousands)			Population (thousands)
				Total	Male	Female	Total	Male	Female

The screenshot shows the ILO STAT website interface. The top navigation bar includes 'Home', 'Download', and 'Metadata'. The main content area is divided into a 'Countries' sidebar and a main table for the 'Korea, Republic of'. The table lists various indicators with their values. An 'Information' popup is overlaid on the table, providing details for the 'Share of adult population with advanced education (%) - 2010' indicator.

Subject	Indicator	Value
Context indicators	Working poverty rate (%)	-
Population and labour force	Share of adult population with advanced education (%) - 2010	35.8
	Labour force participation rate, women (%) - 2016	52.1
	Labour force participation rate, men (%) - 2016	
	Labour force participation rate (%) - 2016	
Employment	Share of agriculture in total employment (%) - 2016	
	Share of industry in total employment (%) - 2016	
	Share of services in total employment (%) - 2016	
	Share of own-account and contributing family worker employment (%)	
	Employment-to-population ratio (%) - 2016	
	Time-related underemployment rate (%)	
	Share of employees working more than 48 hours per week (%) - 2015	27.2

Information

The adult population is defined as persons aged 25 and over, unless otherwise specified. This indicator expresses the adult population with advanced education (tertiary education) as a percent of the total adult population.

Data reference period: July
